WASHINGTON

**DOMESTIC BRAND
RED CLOVER**

**SMOKETOWN
LANCASTER CO.
PENNA, U.S.A.**

INTRODUCTION

In presenting this, our Twelfth Annual Catalog, we want to thank "Our Folks" for their liberal patronage, and trust our future dealings will be equally satisfactory and profitable to all.

Our aim is to produce **the Best that Grows** and even with the advanced cost of production, most of our prices have been kept the same as a year ago.

The Season's Greetings are extended to you, together with our Best Wishes for your Health and Prosperity. Yours respectfully,

I. N. GLICK.

LOCATION

Our Farms are situated in Lancaster County; better known as "**The Garden Spot of the United States**," one-fourth mile Southeast of Witmer Station, and one mile West of Bird-in-Hand, on the main line of the Pennsylvania Railroad, running from Philadelphia to Pittsburgh. Visitors are welcome every day (except Sunday)

INFORMATION FOR YOU

The Glick Seed Farm business is divided into different branches—Mr. Peter L. Rohrer has charge of, and is liable for all transactions in the Farm Seed Department.

The Poultry Farm is in charge of Mr. J. Elwood Hershey, with whom all dealings relative to Poultry must be transacted.

If any information is desired, or in sending in your orders, always **mark on the lower left hand corner of the envelope for which department it is intended**, viz., Seed, Plant, Poultry or General Department.

TERMS OF PAYMENT

All orders must be accompanied by Cash (**No Goods Sent C. O. D.**) You are protected by our guarantee. **Everything we send out must be Satisfactory** to you, or it can be immediately returned to us, and the purchase money will be refunded. Registered Letters, P. O. M. O., Cheques or Drafts are preferred. Small coins if wrapped in paper can be safely enclosed in any ordinary envelope. Paper money is often received, but large amounts should not be sent this way. **Postage Stamps often reach us in worthless condition**, and are very undesirable. Any good substitute for money will do, but **please don't send Stamps**.

Great care is exercised to have everything pure and true to name, and if anything is proved otherwise, we will gladly refund the money paid for it. Other than this we cannot give any guarantee, and will not be held liable for crop results, etc., etc.

A SOUTHERN PLANT FARM

Southern Grown Plants have seldom been found profitable to the Northern Planter, simply because the Southern Grower cannot be made to realize the importance of strong, stocky, well grown plants, **which are an absolute necessity in the North**.

Knowing the requirements of the Northern Planter we have established a Branch Farm in the South, where an effort will be made to produce strong, stocky, field grown plants, and have them ready earlier than it would be possible to grow them here.

Anyone in need of large quantities of Early Plants should write us, stating the number of plants needed, mentioning about what date delivery is preferred, and we will quote prices and submit any information that may be desired.

GRASS AND CLOVER SEEDS

We sell only the highest grades of grass seeds obtainable They are practically pure and are tested for germination before we send them out. **Why not Grow a Few More Loads of Hay from the Same Acreage? Sowing our Guaranteed High Grade Seeds will Help You do it.** You can get seed of ordinary quality at the corner store Good Pure Seed costs more per bushel than lower grades, but when you figure it out the best seed is the cheapest. Every bag of seed we send out is sold subject to Government test. If not found as represented you can return it at our expense.

Domestic Brand Red Clover Medium

This is the common Red Clover so extensively **Grown**. This Brand is absolutely unsurpassed for Purity and Germination and freedom of noxious weed seeds. Our Guarantee protects you. No efforts are spared to keep both Medium and Mammoth separate. The Medium variety is always shipped unless otherwise instructed. Get your order in early and you can depend on getting what you order. Sow eight or ten pounds per acre.

Domestic Brand Red Clover Mammoth

Mammoth or Pea Vine Clover greatly resembles the Medium Clover, but grows coarser and more vigorous. It is the best clover for pasturage, but not as desirable for hay. You can enrich your soil more cheaply by sowing Mammoth Clover and plowing it under than in any other way.

Choice Red Clover

Our Choice Seed is equal if not superior to the best grades offered by the average merchant. We guarantee it to be 99% Purity, and over. If you do not have our samples ask for them.

GENTLEMEN:

Your seed shipped to me has arrived and examined, and is very good. All the seed is very much better than the samples sent me. All are fully satisfied. Thanking you for your promptness and the good seed.

GREENSBURG, PA., February 12, 1916.

Very truly,
O. J. MECHLING.

For Prices on Clover Seeds See Latest Price List.

Alsike Clover

Alsike Clover is one of the hardiest varieties known. Does not winter kill. It will do better on moist land than any other kind of clover. It is suitable for pasture or hay. It is frequently sown both with Medium Red Clover and with Timothy and makes excellent hay. One part Alsike with three parts Red Clover makes a profitable mixture. If sown alone sow 8 lbs. per acre.

Crimson Clover

Crimson Clover is the most profitable variety of clovers for improving the soil. Is valuable as a cover crop for green manure. Crimson Clover is usually sown in the corn, or other crops, and in orchards, before the last cultivation, and makes sufficient growth in the Fall or Spring, so that it may be turned under in time for sowing your Spring crops. Sow 15 lbs. of seed per acre. Sow only the very best grade which is by far the cheapest in the end.

Red Top

This will do well on any kind of soil, and is one of the best known grasses. We especially recommend sowing it when a field of grass is to remain over one year. Red Top is largely used in pasture mixtures. One pound of Red Top and three pounds of Timothy will increase your yield of hay. We sell only the best grade of solid re-cleaned seed.

Timothy Seed

Timothy Seed is so well known that it needs no description. It is largely sown with Red Clover, and with grass mixtures. Can be sown Spring or Fall. If sown alone sow six quarts per acre.

Sweet Clover—White Blossom

A variety of Clover that resembles Alfalfa, both in appearance and habit of growth when young. Grows larger than Alfalfa. It is valuable in the bringing up of old worn-out soils and thrives well on extremely poor soil. If plowed under it adds humus and nitrogen to the soil. Its greatest value, other than fertilizer, is in preparing the soil for Alfalfa, as the bacteria of Sweet Clover is the same as that of Alfalfa. Sweet Clover will thrive on all classes of soil, and will inoculate land otherwise too poor to establish Alfalfa. Can be sown Spring or Fall. Sow 20 lbs. of hulled seed per acre. We sell Northern Grown Seed only. Best quality in Purity and Germination.

DEAR SIR:

I received the seed O. K. and wish to thank you for care in selection of them.

BUCHTEL, OHIO, April 8, 1916.

Yours truly, HENRY STEGE.

DEAR SIR:

Received in O. K. condition. Am well pleased with the appearance of the seed. Thank you for your prompt service and square dealing.

SUSQUEHANNA, PA., May 25, 1916.

I am, Yours very truly, L. C. TURRELL.

ALFALFA

The Money Making Crop of the Farm

Alfalfa is now being raised successfully both in the Eastern and Western States, and is one of the most profitable hay crops for the farm.

Do not take any chances on your crop by buying cheap seed, but insist on getting True Montana Grown, Non-Irrigated Seed, such as we have been selling for a number of years. It will pay you. Is superior in many ways. It has a stronger vitality, better hay qualities, is much hardier, produces more hay per acre, and starts to grow earlier in the Spring.

Alfalfa requires a deep well drained soil, free from weeds. If land is sour it may be remedied to the use of lime. It is also a very good plan to turn under plenty of well rotted manure before applying the lime. Land should be worked thoroughly and in good condition.

Sow 20 lbs. of Northern Grown Seed per acre. Can be sown broadcast or drilled in. Seed should not be covered up very deep. Can be sown Spring or Fall. If sown in the Spring we recommend sowing a nurse crop in order to check the weeds until the Alfalfa is nicely started.

We recommend the Montana Grown Seed, Non-Irrigated, because successful growers have found it more dependable than Imported or Western Grown Seed, and for this reason we sell only one grade. Sample and price will be mailed to all who are interested in this valuable crop.

MR. P. L. ROHRER—DEAR SIR:

My order arrived two days ago and came through without any damage to the bags. The seeds are all very satisfactory indeed.

WAYNE, MICH., March 24, 1916.

Respectfully, D. M. MERRYLEES.

DEAR SIRS:

Received the grass seed all in good order.

HOPEWELL JUNCTION, N. Y., March 23, 1916.

Yours truly, STEPHEN C. VAN WYCK.

Permanent Pasture Mixture

One of the most profitable and valuable crops on a Dairy or Stock Farm is abundant pasture. Our Mixture consists of different varieties that are not found in low priced Mixtures, and is proportioned as to insure abundant growth from early Spring until late Fall. It may be sown from early Spring until first of September. Sow 20 lbs. of seed per acre for best results. The soil should be well prepared and contain sufficient moisture to sprout the seed. A light drag can be used to cover the seed. If sown in the Spring it is best to sow a nurse crop to check the weeds. One-half bu. of Oats or Winter Rye may be sown per acre before you sow the seed.

Fancy Lawn Grass Seed

This Mixture is composed of the very best grades of seed. These grasses will make a quick growth and cover the ground in a few weeks after sowing the seed and form a Permanent, Rich, Green Turf. Lawn should be rolled after seed is sown.

Price 20c per quart postpaid.

Swedish Select Oats

Swedish Select Oats Seed

(Northern Grown)

An early extremely productive variety with tall, stiff straw, bearing long heads filled with good weight grain weighing 36 to 38 lbs. per measured bushel. This seed has been raised in the Great Northwest. Our past experience has proved to us that all kinds of seeds grown in the North are hardier, more vigorous, and more productive than Southern grown. This is especially true of Seed Oats. If you have been using home grown seed with unprofitable or just ordinary crops try our Northern Grown Seed Oats this year and your oat crop should be a money maker.

DEAR SIR :

I received the Clover and Timothy Seed to-day. Am well pleased with it. Yours truly,

ALBERT FESLER.

DEAR SIR :

The seeds were received in good condition. I thank you for your promptness. Respectfully,

A. F. SCHROEDER.

WOOSTER, OHIO, February 24, 1916.

LOGANTON, PA., April 29, 1916.

For Prices on Clover Seeds See Latest Price List.

Bountiful Yellow Dent

Bountiful Yellow Dent Corn

Our experience has been that this variety of corn has yielded more bushels per acre than any other variety. It is a robust grower and owing to its great root development it will stand throughout the dry season more than any other corn. Ears attain an immense size. It is a good keeper, and commands highest market price. All seed is of selected ears. Any one purchasing seed from us can have same tested and if not found as we represent it same can be returned at our expense.

Improved Leaming Corn

This has long been considered one of the best Yellow Dent varieties, both for grain and for fodder. It is medium early. Ears are large, with very deep yellow kernels. Cob is small. This corn succeeds well on nearly all kinds of soil, and produces large

crops of high grade yellow corn. This is also a good variety to plant for Fodder or Ensilage as well as for Grain. See Price List.

Early Eureka

Because of the great yields of fodder this variety has become very popular. Stalks grow from 12 to 15 feet in height, and produces from three to four ears per stalk. It has been said that this variety will produce more tons of fodder per acre than any other kind. The grain will not mature in the Northern States.

Canada Field Peas

Canada Field Peas are usually sown with Oats for Hay. If anyone is likely to be short of hay he will do well to sow a few acres of Oats and Peas, which will make hay equal to the best Clover Hay. It should be cut when the Oats head, but before the grain is ripe. We have already used this for hay with best results. Sow $1\frac{1}{2}$ bus. of Oats and $1\frac{1}{2}$ bus. of Peas per acre. Our Seed is Northern Grown and is very Hardy and of High Germination.

Why Not Order Your Grass Seed Now?

All orders for Grass Seed for future shipment will be booked if \$1.00 per bu. is sent cash with order. The balance can be paid when you tell us to ship the seed. This will protect you against higher prices later.

Freight is prepaid on orders of two bu. or more. Bags 20c.

For Prices on Farm Seeds See Latest Price List.

MAINE GROWN SEED POTATOES

Grown Especially for Seed by Seed Growers

Our Seed Stock is grown for us by one of the most reliable growers in Aroostook County, Maine. All Seed is carefully selected. Guaranteed true to name. Seed that will produce a larger yield, and Potatoes of finer quality than the stock usually sold in the open market for seed purposes. All seed is sold on the Money Back Plan, guaranteed to please the purchaser. Potatoes are shipped in Heavy Burlap Bags, for which we make no charge. We begin shipping in the Spring as soon as the weather will permit without freezing. Car lots are shipped direct from Maine. Unless otherwise mentioned the purchaser pays the freight or express charges on all orders for Seed Potatoes.

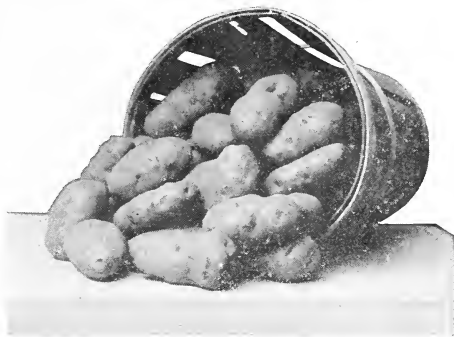

Irish Cobblers

An early, white skinned variety, very short, thick, inclined to round. This is yearly increasing in popularity for the early market. The crop is ready about ten days earlier than the Early Rose. The vine is very stocky and vigorous, not as liable to be affected with blight or to suffer drought as most others. Owing to the fact the Cobblers withstood the severe drought of last season better than any other varieties, it is quite probable that there will be a larger demand than usual for it this season. We advise ordering early.

For Prices on Farm Seeds See Latest Price List.

Washington

This being the third year we have been offering the Washington, and our folks have found them **Absolutely the Biggest Yields and the Most Profitable Variety**. It is oblong, slightly flattened in shape, grows to immense size. The skin and flesh are white, and a very good keeper. Many of our prominent growers are planting them exclusively. It matures several days earlier than the Green Mountain. If you want to grow a **Bumper Crop** plant the Washington.

Sir Walter Raleigh

A Main Crop Variety that is here to stay. It is a great yielder, large in size and very smooth. It is the best keeper of any late varieties and usually brings the highest market prices. In shape it is round to slightly oblong. The skin and flesh are white. Our stock is true to name and cannot be surpassed.

Washington—4500 bu. from 15 Acres

Improved Green Mountain

This variety has proved to be the surest cropper and one of the most profitable varieties. The skin is pure white, slightly netted. The quality is one of the best. It is an excellent keeper and a good shipper. Together with its fine table qualities, makes it one of the foremost varieties on the large city markets.

Early Day Break

It is extremely early. Can be safely termed the earliest White Potato known. It has pink eyes. Is round to oval in shape, and one of the most productive Early sorts.

Early Ohio

It is sometimes difficult to obtain Pure Early Ohio Seed. Other pink-skinned varieties are frequently offered as being Early Ohios. The seed we offer is Pure Stock and true to name, and like all other varieties, it is sold by us under a **Money Back Guarantee to You**. It grows quickly, cooks mealy, and keeps well for such an extremely early variety.

For Prices on Farm Seeds See Latest Price List.

Early Six Weeks

Sometimes sold as the Red Bliss, or Red Triumph. We consider it the best extra Early Red Skinned Variety. It grows to a good size. Has square ends, flesh is white and firm. Is extensively planted for market.

Early Rose

The Stock we offer of this old-time Favorite Variety is True to Name. If you have been unable to buy true Early Rose, try ours. You will be highly repaid.

Carman No. 3

A Robust Grower. The foliage is a dark green, a great drought resister. In color it is pure white. It is widely known as one of the best Main Crop Varieties. The tubers are slightly flattened, and attain an immense size.

Vermont Gold Coin

This Late Main Crop Variety has become very popular. Vines are strong with exceptionally deep foilage, making a heavy growth and seldom known to blight. The tubers are of good size, and lie close together on the hill. The flesh is of excellent quality, and fine grained. Shippers prefer it to all others. You will not go wrong in ordering from us. It will increase your profits.

For Prices on Farm Seeds See Latest Price List.

Seed Potato Eyes by Parcel Post

Any one wishing a few early potatoes to plant in the garden will find this a splendid and cheap way to get them. Many of our customers are taking advantage of this offer.

You May Select Any Variety You Wish. But we will not send more than one variety in the same box. The seed is put up well and will carry safely to any part of the United States. Seed is ready to plant and we suggest that our customers mention the date of delivery when ordering.

Each box contains 100 Eyes. Will plant 100 ft. row.

Single box, 60c ; two boxes, \$1.10.

Why Not Order Your Seed Potatoes Now?

It may save Time and Patience at Planting Time. Your orders will be booked for future shipment at present prices if \$1.00 cash per barrel is sent with the order. Balance can be paid when you want the seed shipped. We would advise you to order your Seed Potatoes early, as the crop has been very short throughout the country.

Onion Sets

The Yellow Globe Danvers is the most productive and best keeper. In quality it is equal to the White Silver Skin. Our Sets are clean and right in size, and will plant further and less liable to run to seed.

Price 20c per quart postpaid. Larger quantities, see Latest Price List.

Because of Crop Failures we will not have any White Sets to offer.

Lancaster County Grown Seed Wheat

Possibly no other country in the world is better adapted to growing Seed Wheat. The deep fertile soil of Lancaster County produces Strong, Vigorous Seed, that has no superior. We make a specialty of Pure Seed Wheat. After the seed is harvested and threshed it is carefully recleaned before shipping it to our customers.

When in the market for Seed Wheat write for Prices and Samples. We are in a position to furnish both Smooth and Bearded varieties at reasonable prices.

PLANTS THAT GROW

**Why take Chances on your Crop when you can Buy Strong Stocky Plants?
Guaranteed to Reach You Promptly in Good Condition.**

Parcel Post Packages

Plants are grown from the best strains of seed obtainable. All the leading varieties. Strong, transplanted plants. Well hardened and shipped in our special ventilated packages will reach you quickly in good condition.

You take absolutely no chances. Our Guarantee Protects You.

The Postage and Express Charges are Prepaid on all plants at prices quoted in this catalog. Small orders (2,000 plants or less) are usually sent by Parcel Post. Mention distance you live from each.

Ready March 15th to June 1st.

Barr's Mammoth Asparagus Roots Palmetto

Strong Roots. Dozen, 20c. 100, 75c. 1,000, \$4.75. 5,000, \$20.00.

Early Sure Go Early Beet Early Eclipse

Dozen, 10c. 3 Dozen, 25c. 100, 60c. Each additional hundred, 35c. 1,000, \$3.40.
Each additional thousand, \$3.00.

Early Cabbage

The Early Jersey Wakefield, Copenhagen Market and Early Summer can be considered the most profitable sorts. The Copenhagen Market is several days later than the Wakefield, but it is larger in size and its superior qualities have made it very popular. The Early Summer is a flat-headed variety. It matures 10 days later and is a sure header.

Early Cabbage in car lots usually commands good prices on the large city markets. It is easily grown and persons located near a railroad station should consider it as one of the most profitable early crops. From ten to twelve thousand plants are required per acre.

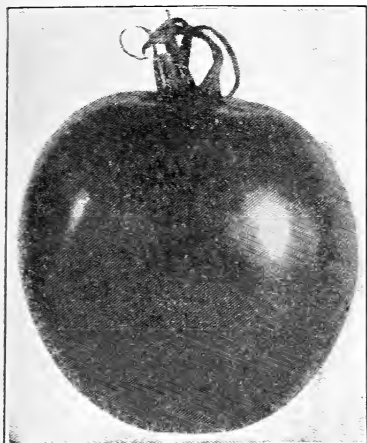

Copenhagen Market

Dozen, 15c. Each additional dozen, 10c. 100, 90c. Each additional hundred, 65c. 1,000, \$5.50. Each additional thousand, \$4.50.

Ready April 1st.**Early Snowball Cauliflower**

Plants are produced from seed that we import especially for growing these plants. If care is exercised not to stunt the plants, handsome large white heads can be expected.

Dozen, 20c. Each additional dozen, 10c. 100, 90c. Each additional hundred, 70c. 1,000, \$6.75. Each additional thousand, \$5.75.

**Early Fourth of July**

plants. When the water has soaked away, bring up the balance of the soil and firm it slightly around the plants. Three Plants, 15c. Dozen, 45c. 100, \$2.75.

Tomato

Spark's Earliana
Early 4th of July
Ponderosa

Bonnie Best **Matchless**
Chalk's Jewel **Livingston Stone**
Dwarf Stone **H. Selected Globe**

The Early Fourth of July seems to be the most popular all around variety. It ripens only a few days later than the Earliana. It is more perfect in shape and color and yields an abundance of handsome fruit until late in the season.

All varieties, 8 inch plants. Dozen, 15c. Each additional dozen, 10c. 100, 90c. Each additional hundred, 60. 1,000, \$5.50. Each additional thousand, \$4.50. 5,000, \$20.00.

Extra Strong Tomato Plants (in Bud)

Spark's Earliana. Early Fourth of July.

When ordering Extra Strong Tomato plants be sure your soil is ready to receive the plants as soon as they arrive. The best time to set plants is in the evening. Set them down deep, put some fine soil over the roots, then pour in at least 2 quarts of water to every dozen

Victoria Rhubarb Roots

Single Roots, 20c. Each additional root, 15c. Dozen, 75c.

Lettuce

Grand Rapids and Big Boston are grown in large quantities. Our strain of Big Boston produces immense solid heads, very desirable for the home garden or market.

Dozen, 10c. Each additional dozen, 7c. 100, 60c. Each additional hundred, 50c. 1,000, \$4.50. Each additional thousand, \$3.50.

Ruby King Peppers Chinese Giant

Yours truly,

LAKEVIEW, OREGON.
GARDNER & WHITE.

DEAR SIR :

Plants arrived yesterday in good condition. We are very much pleased with them.

BEAVER, WISCONSIN.
Very truly yours, PAUL SCHLAG.

The Postage and Express Charges are Prepaid on Plants.

Field Grown Plants

Vigorous, healthy plants are essential. All varieties are grown on different soil each year. Field Grown Plants are grown in rows 10 inches apart. As soon as the young plants appear, wheel-hoes are brought into use. Plants are kept well cultivated; are stocky and develop a strong root system. A digging device running underneath the plants prevents tearing the roots. When you buy plants from us, **you get the Roots, too**, and can expect safe arrival of stocky, robust plants that will be **Profitable to You from the Start.**

Each, 15c. 5 for 50c. Dozen, \$1.00.

DAHLIAS.

Fancy Show and Cactus Dahlias. Best Varieties. Mixed. Each, 15c. Ten for \$1 00.

POULTRY DEPARTMENT

You will find listed below, seven of the most profitable and well known breeds of poultry that are bred to-day. From these varieties we can furnish Day-Old Chicks, Eggs for Hatching and Breeding Stock. All our stock is **GUARANTEED PURE BRED** and are **BRED FOR EGG PRODUCTION**. Each breed is kept on separate farms to prevent cross-breeding. Our best efforts are to produce stock that is **Large in Size, Vigorous and Healthy**. **The Low Price and High Quality** of our stock will be certain to **Save You Money**. We do all we can to help you no matter if the order is for Eggs, Chicks or Stock. You will not get **Greater Value Elsewhere**.

One of Our Many Flocks

OUR VARIETIES

S. C. W. Leghorns. A lengthy description is unnecessary. Their qualities are so well known that **they are the greatest Egg Producers of all**. Their eggs are white shelled, and bring 10c to 20c more per dozen than brown eggs on the New York market. We have the **American and English Strains**. They are the **Big Kind, and have Lay Over Combs**.

S. C. Brown Leghorns. This breed has the same good qualities as the S. C. W. variety and many prefer them because of their dark color. **They are Pretty**. The chicks resemble partridges and opening our nurseries filled with these beautiful "Brownies" is a sight to please any one.

S. C. Black Minorcas. This variety closely resembles the Leghorns, but are larger and have glossy black plumage. They lay the largest white egg of any chicken. If you like a black chicken this is the breed for you.

S. C. Rhode Island Reds. No better medium sized breed can be found than the "Reds." They are very active and productive. Are noted for their hardiness and the chicks are very easily raised. **Our Stock of Reds are Thorougbs and won't Disappoint You.**

White and Barred Rocks. For market poultry and large early broilers, you want the Rocks. Our stock in this variety is from one of the best Egg Strains in this country. They lay when eggs are high and will prove to be **Money Makers for You**.

White Wyandottes. This breed is the **Acme of Perfection**. Wyandotte Chicks at one pound each make what is known on the city market as **Fancy Squab Broilers**, and when hatched early bring **Fancy Prices**. At this age they are plumper than chicks from any other breed and have the deep yellow skin and legs. As egg producers they are coming out ahead, having won the egg laying contest over all the other breeds at one of the largest contests held in the Eastern United States.

Our Specialty is Day-Old Chicks

CHICKS. We were pioneers in the Day-Old Chick Business. Many of the most prominent breeders were slow in taking up this way of selling their stock. After seeing the demand and advantage to their customers they now sell chicks.

Many years of "Successful" experience in packing and shipping chicks prove to us it is the most reasonable, economical and convenient way of getting foundation stock or new blood into our flock. We sell chicks by the thousand to our customers to replace their old stock each year.

In hatching our chicks, we use only **New Laid Eggs**, carefully selected from healthy stock. Our machines are thoroughly washed and disinfected before each hatch. We believe in "applied moisture" to get large sized and healthy chicks. This method of hatching and our Carefully Selected and Guaranteed Breeding Stock will produce the kind of chicks you want. It is the only way to produce **Good Healthy Chicks** that will live and grow for you.

Our Special Made Shipping Nursery is really a small brooder. So certain are we it is able to care for and protect the little "downy balls" during their ride from our hatchery to you that we **Guarantee Safe Delivery of Full Count of Living Chicks**, anywhere East of the Mississippi River.

SURPLUS CHICKS. Oftentimes our hatches are better than we expect, and we have more chicks than it takes to fill our regular orders. We sell these chicks at a sacrifice to any one willing to place his order in advance for the number he could use and allow us to fill the order when we have the chicks. These chicks are equal in size, vigor and quality to any chicks we sell, only they will be from any of our varieties. **Here is Money Saved for You**, if you are not particular about the breed. See prices below.

Eggs for Hatching

If you prefer to purchase eggs and do your own hatching, send your orders to us for **Good Eggs, from Good Stock at a Low Price.** We send out only **New Laid Eggs** of good fertility from **Guaranteed Pure Bred Stock.** Eggs are shipped in baskets with special cut fillers, making a "Shock Absorbing" compartment for each egg. Packed in this manner they are sure to reach you in good shape and hatch well. In case of poor hatch we will replace order at half price if 25c extra is included to pay cost of packing and shipping.

Prices of Chicks. S. C. W. Leghorns 10c each. S. C. Brown Leghorns, 11c each. All other breeds, 14c each. Surplus Leghorns, 8c each. Other breeds, 10c each. All chicks **Prepaid** in lots of 100 or more. **Don't Overlook the Surplus Chicks.**

Prices of Eggs. 15 Eggs, \$1.00; 30 Eggs, \$1.85; 50 Eggs, \$2.50; 100 Eggs, \$4.50. **We Pay Parcel Post and Express on all Eggs.**

Please Note. You can get S. C. W. Leghorn Chicks at all times. Other breeds should be ordered 30 days in advance to insure date of delivery. You are looking for something that will please you and add to your income, why not order some of our **Guaranteed Pure Bred Chicks**, or write for prices on breeding stock, telling us what you want and we will quote you **Low Prices.**

DEAR SIR:

Received the Minorca Chicks March the 23rd, in first-class condition. We weighed them the 24th of April. They averaged 6½ ounces apiece. We have 49 left out of the 53 sent me. I remain, F. W. REAM.

HELLAM, PA., April 25, 1916.

GLICK'S POULTRY FARMS:

Chicks arrived the next evening after shipment in first-class condition. The brightest, liveliest little fellows imaginable. Two have died, but I do not think any more will. Many thanks for the extra four. I am taking the very best of care of the little chipmunks. Respectfully, MRS. L. W. CHAPLIN.

YOUNGSTOWN, N. J., June 1, 1916.

SIR:

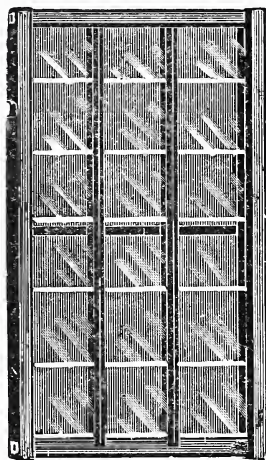

Have received the Baby Peeps. Am well pleased. My wife says they are the hardest little Peeps she ever saw. The 50 are all alive. Yours truly, JAMES GEIGER.

POTTSVILLE, PA., May 12, 1916.

TENNONLESS HOT BED SASH

Securing Sash that are properly constructed has been a difficult problem. Knowing the importance of having strong, well made sash, has prompted us to manufacture a specially constructed tennonless sash of our own.

It is made from No. 1 Cypress, **free from Sap and Knots**. There are no tennons to rot off, thus increasing the life of the sash. Another nice feature they **throw less shade, yet are Stronger than most Sash** of their size now on the market.

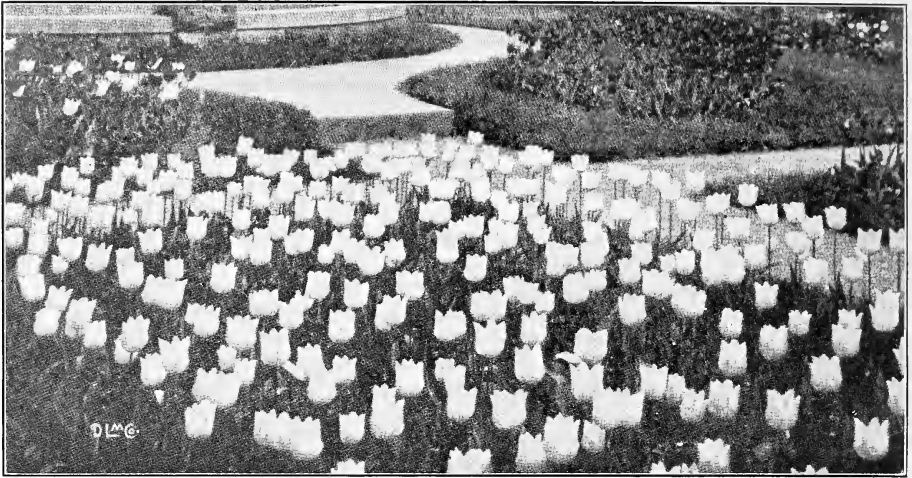

We feel safe in offering them as being the lightest weight and most durable and best constructed sash ever offered.

The sash are 6 feet long, and are made for 3 rows of 10 inch (width) glass. The bars are grooved so the glass will slide in nicely from the one end of the sash. **No Putty is Required.** All sash are shipped unpainted, without glass.

Prices—crated f. o. b. here : Four or more, 85c each ; \$10.00 per dozen.

TULIPS LIKE THESE

are easily grown if you will plant the Bulbs in October, and are by far the most attractive for early Spring display in the garden or lawn. When the bed is well prepared, remove 4 inches of the top soil, then mark the rows, either round or square, according to the shape of the bed preferred ; place the bulbs in an upright position, from 4 to 6 inches apart each way, then cover with the soil to a uniform depth of 4 inches.

The varieties we offer produce large flowers on stems 10 inches high.

FOUR BEST COLORS

Maes—Rich Scarlet.

Queen of the Whites—Pure White.

Queen of the Netherlands—Delicate Pink.

Kaiser-kroon—Brilliant Red, **Golden** Edge.

Separate or Mixed Colors : Dozen, 35c ; 100, \$2.75. **Prepaid.**
